

Improving health information & communication for people with disability and carers

The Health Care Consumers' Association is doing a survey of people with disability and their carers about health literacy - how you find, understand and use information about health and health care.

We want to hear about:

- how you find and use information about health
- your experiences of communication in health care
- what would make it easier for you to get the information you need.

Your thoughts will help us suggest ways to improve health care in the ACT.

Take part in our research if you are

- aged over 18
- a person with disability
- or caring for a person with disability
- use health services in the ACT

We encourage carers and supporters to help people to complete the survey if needed.

Want to take part? You can:

Do the online survey

**Contact us to do the survey
in-person or over the
phone.**
